

Friday, 3 April 2020

As concern around COVID-19 continues to grow, we want to assure you that the Covaris Team has planned and implemented WHS and working protocols to ensure that we safeguard the health and well-being of our team, our community, and our clients.

Covaris is proud of our partnerships with our Clients in delivering value through our Services in Australia, NZ and throughout the world. We are in a strong financial position and are committed to our fantastic team and to our clients in delivering the same level of service and responsiveness throughout this time, regardless of what happens over the coming months. Covaris has been delivering value for 20 years and will continue to do so in the future.

Covaris is fully capable of working remotely with our clients with minimal to no interruption or effect on our delivery. As part of our ISO 9001 certified quality management system, we have developed robust business processes and have implemented cloud-based information systems and technologies that enable our project management, collaboration and communication within our Teams and with our Clients. Covaris utilises video-conferencing tools to allow us to hold meetings, workshops and engage with our teams and clients. Covaris has been using and continually improving our processes and the use of distance delivery tools and methods for many years in order to deliver value for money to our Clients.

Covaris has a Working from Home policy which we have scaled and adjusted in response to COVID-19 risks. We have reviewed and implemented our contingency plans including COVID-19 WHS and Workplace protocols to ensure that our Teams can continue to deliver our services even when not in the office.

Over the last 20 years, Covaris has invested in development and implementation of our own cloud-based asset management software in support of our Clients and distance delivery of our services including:

1. Watchfire Asset Data Analysis – Covaris will ingest large data sets from ERP/EAMS/CMMS, operational and control systems, and will analyse and provide actionable improvements using our AI enabled software.
2. Web AMP – Cloud Asset Management Planning software that enables collaboration, analysis and development of risk vs cost vs performance-based asset management plans.
3. Covaris Cloud-Based Reliability Toolbox, enabling analysis, modelling, and collaboration with Covaris and the Client's teams
 - a. Web Criticality –Asset Criticality Analysis
 - b. Web RBD – Reliability Block Diagram analysis software
 - c. Web FMEA – Failure Modes and Effects Analysis software
 - d. Web Fault Tree - Fault Tree Analysis software
 - e. Web CIP – Continual Improvement Plan – Registering all reliability issues, investigations, proactive plans, optioneering, analysis and business case development.

We will continue to monitor this quickly changing situation, adjusting our policies, protocols and process while always complying with all Government directives and clients' policies.

We are committed to our communities, our people and our clients and offer any support and appreciate any support offered to us. Our thoughts and prayers are with anyone affected by this virus. Please stay safe and well during these challenging times and if there is anything, we can do to help please don't hesitate to contact us.

Bob Platfoot

Principal and Managing Director
